Plant Trees

When trees are burned, trees release carbon dioxide back into the atmosphere. High carbon dioxide levels is harmful.

In order for us to work against global warming, we have to plant more trees than we cut down.

Protect the Environment and Earth

- **Deforestation** is the clearing, or cutting down, of forests. The word is normally used to describe the actions of humans in removing forests from the planet, rather than destruction caused by such natural events such as hurricanes.
- With growing population, industrialization, building of factories trees are cut down to make room for farming, houses, or factories.
- Trees and other green plants produce **oxygen**, the gas needed by humans and other animals to live. When trees are cut down, less oxygen is released into the atmosphere. Trees also capture **carbon dioxide**, one of the gases that contribute to a problem known as **global warming**.

Protect the Environment and Earth

- The future of our planet desperately needs to be safeguarded, with [climate change](#) already creating disorder in our natural environment. In order to preserve the earth for future generations, we need to reduce the amount of harm that human activities have on the environment. And support the natural world as much as we can.
- Nature itself is our biggest tool in the fight against global warming, and [through conservation work](#).
- **By conserving resources and protecting your environment YOU can make a difference.**

Get Involved and Take Action as per Beloved Hazoor (atba)

- During a virtual mulaqat with Hazrat Mirza Masroor Ahmad, Khalifatul Masih V (may Allah be his Helper), Huzoor instructed Atfal, Khuddam, and Waqaf-e-Nau to plant trees to counteract deforestation and climate change.
